Description
The touchCUE-10-B is wired built-in touch panel offering clean modern design with edge-to-edge front glass and sleek aluminium body. It is ideal front-end for any wall, lectern or furniture built-in applications. Fully compatible with CUE controllers and interfaces, this touch panel provides the ultimate one-touch solution for meeting rooms, conference rooms, boardrooms and high-tech homes.

The 10.1” active matrix touch screen display offers resolution 1 280 x 800 pixels and it produces stunning true color images. Touch panel is equipped with projected capacitive touch overlay. Single cable Ethernet connection provides easy network integration. The touch panel is equipped with Power over Ethernet (PoE) technology enabling an Ethernet network cable to deliver both data and power.

The touch panel installs easily over a standard European/UK/US and other electrical boxes. It can also be attached directly to drywall and other surfaces over the front of cutout. When installed it protrudes only 16 mm from the mounting surface.

Installation
1. Install the wall adapter to the wall box using two screws.
2. Install touch panel on the wall adapter.
3. Fix touch panel to the wall adapter using screw.

Application Diagrams
The following diagram describes the use of touch panel with controllers. In this case the touch panel serves as graphic user interface only and devices are controlled from the controller.

The following diagram describes the use of touch panel with IP controlled devices only. This configuration allows to create cost effective distributed control solution where touch panel serves as controller and graphic user interface in one box. In Cue Visual Composer touch panels and controllers are programmed in the same way, which makes possible to use touch panels as fully functional control units.
